

Better together.

Don't use Excel for charting.

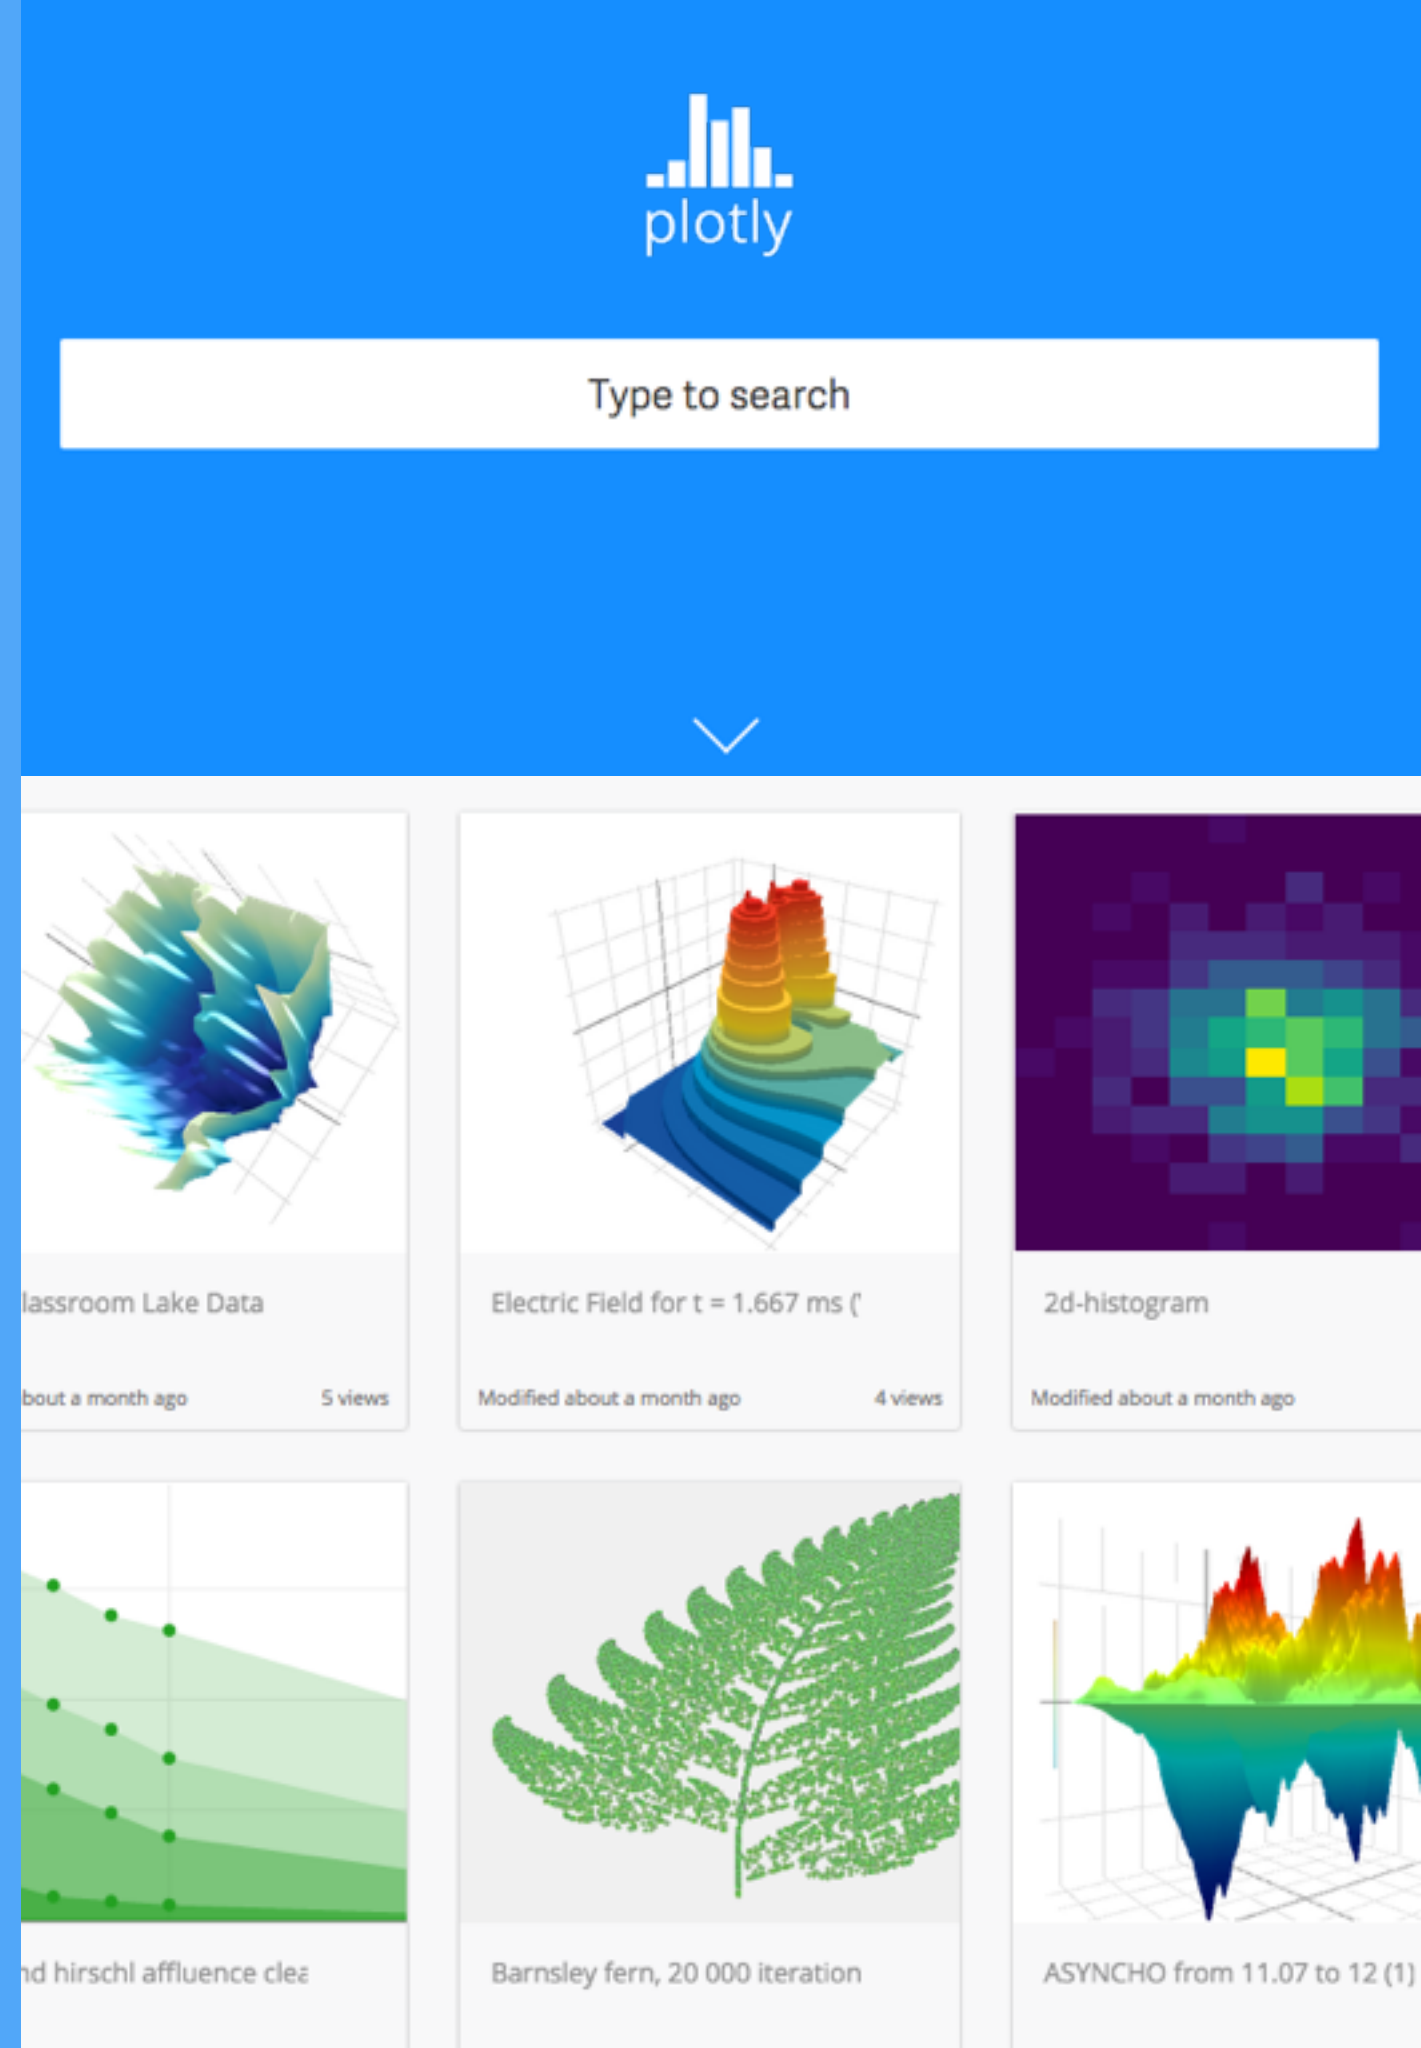

Upload Excel sheets to Plotly for best practice charts, data driven reports, and dashboards.

MS Sharepoint

from year 2050

Bring the data, charts, and discussion to the cloud

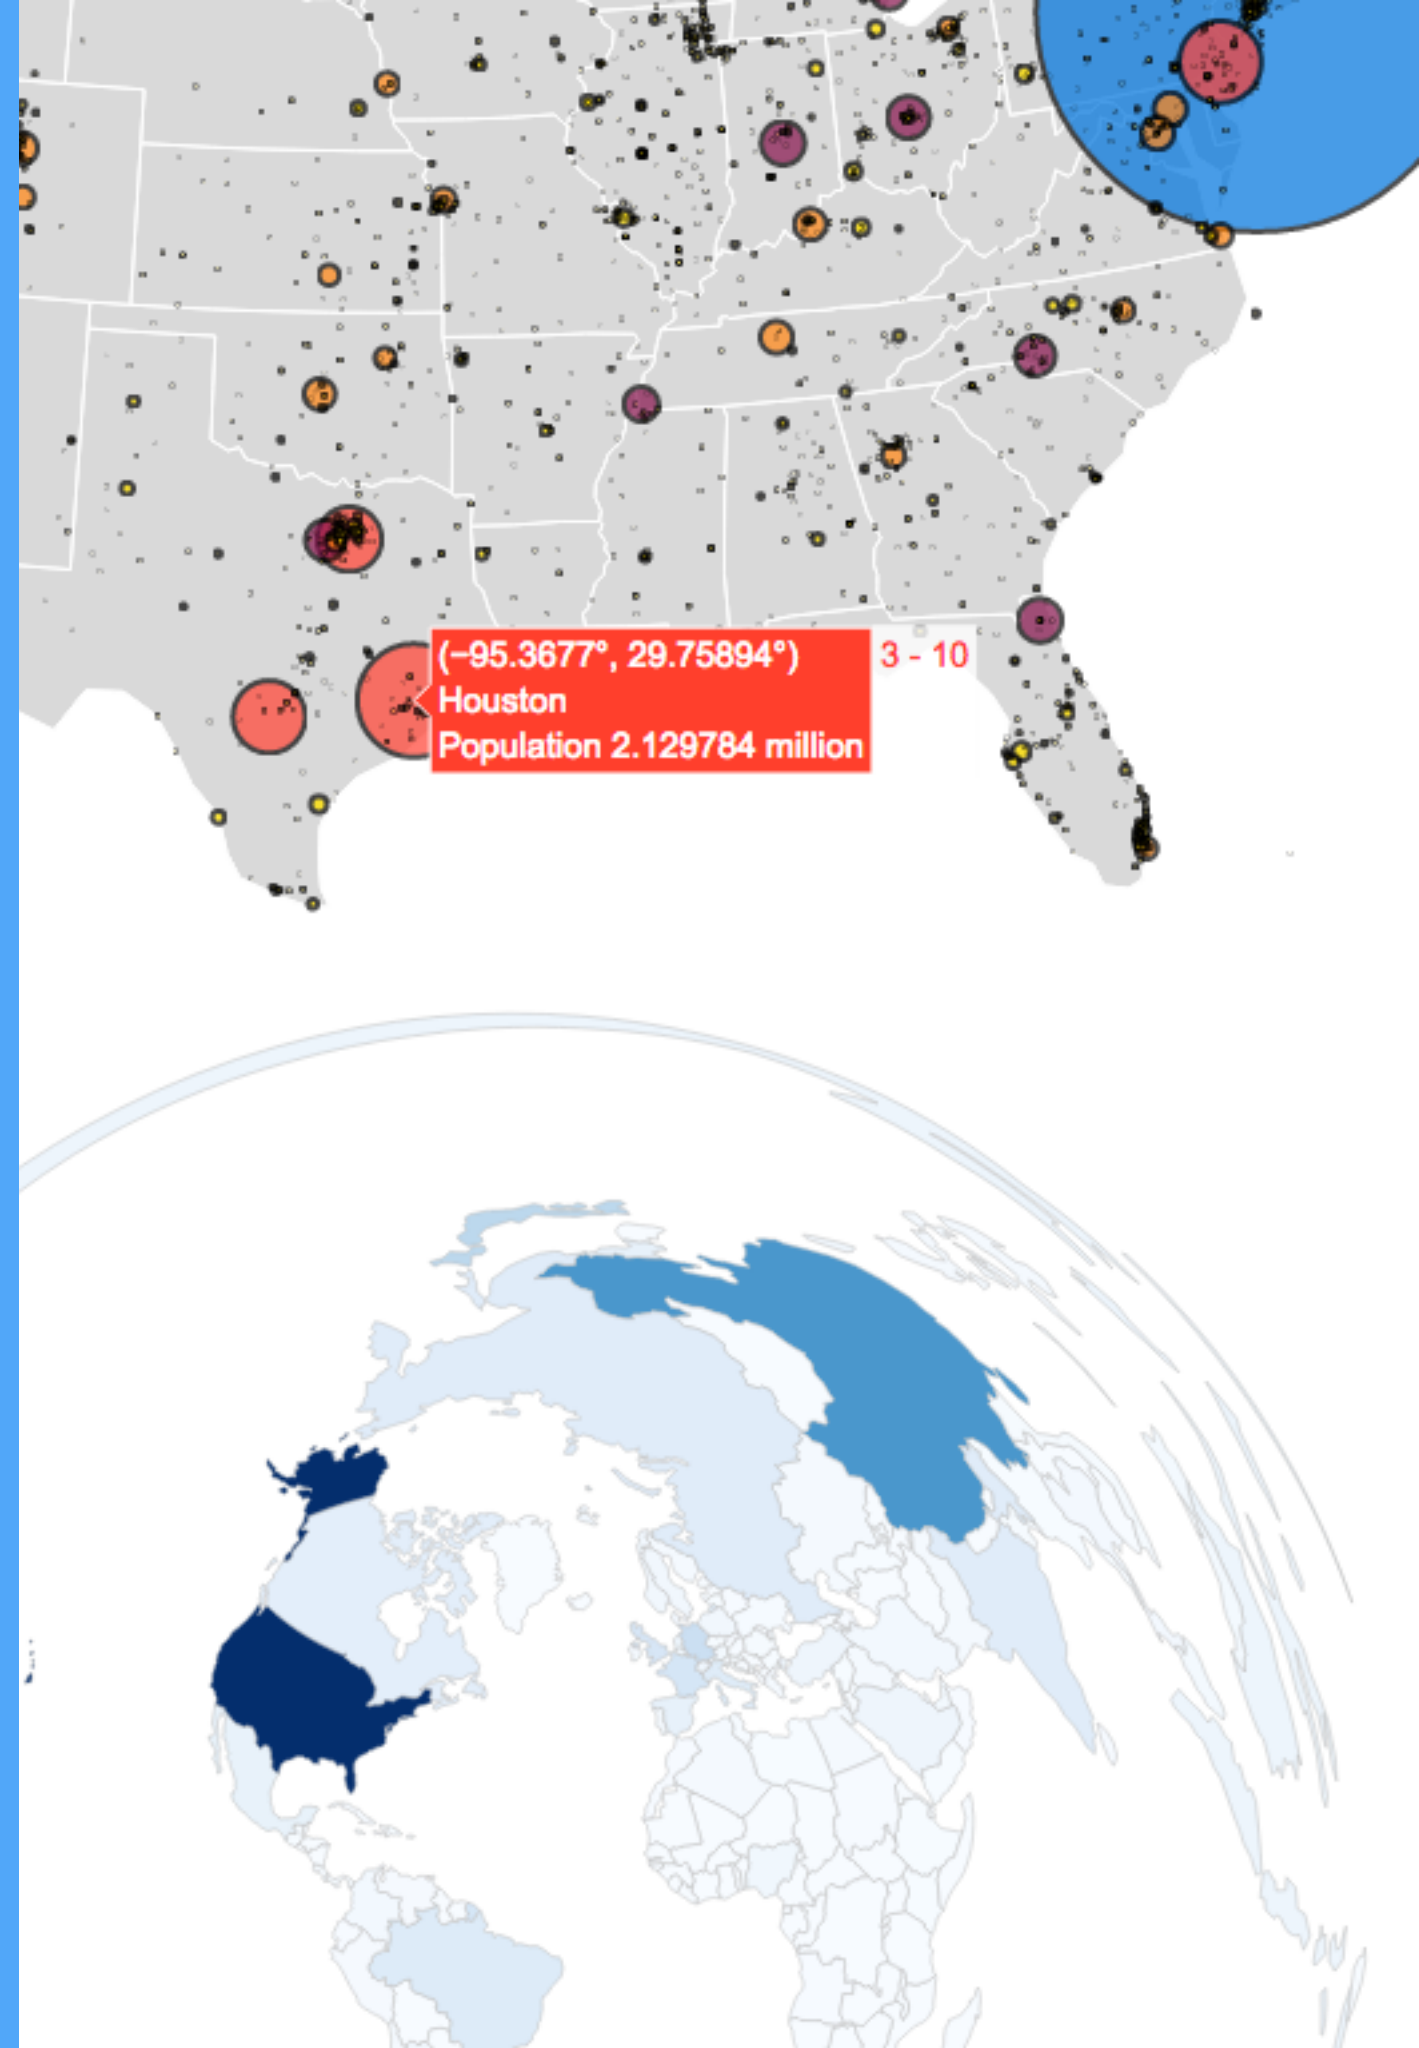

1. Upload Excel sheets to Plotly
2. Create charts
3. Apply company brand
4. Add charts to reports and dashboards
5. One-click sharing
6. Join discussion on your colleague's data visualizations

Uncompromising graphics

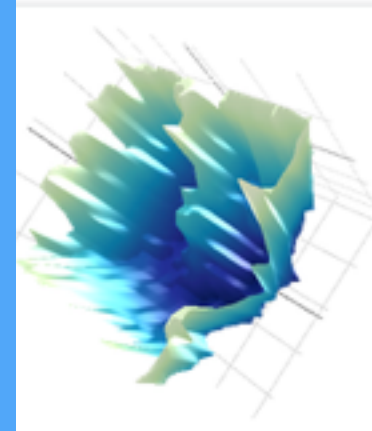

Fully interactive charts
(zoom, pan, hover text)

Plotly makes *D3.js* technology
accessible to Excel users - The
same graphics engine used by the
New York Times.

Always On-Brand

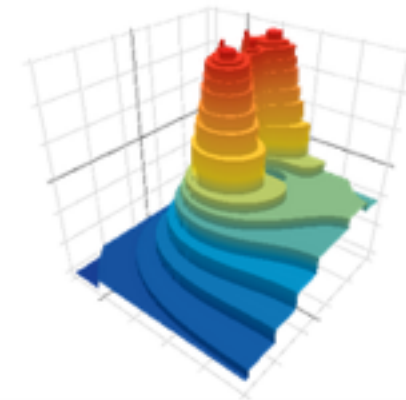

Set the default colors and fonts for all charts at your company.

On-Premise security

Can't use the cloud?

We've got you covered.

Plotly will deploy an On-Premise server behind your company's firewall, accessible only at an internal address:

`plotly.acme.com`
